

SELECTIVE MEDIA STORAGE BASED ON USER PROFILES AND PREFERENCES

Abstract

5 In an embodiment, a method includes receiving a signal having a number of
frames into a device coupled to a display. The method also includes retrieving a
past viewing profile for a user of the device and at least one cue regarding viewing
preferences provided by the user. Additionally, the method includes storing at least
one sequence that is comprised of at least one frame based on the past viewing
10 profile of the user of the device and the at least one cue regarding viewing
preferences provided by the user.
